

MANAGEMENT INFORMATION SYSTEMS QUARTERLY

Table of Contents

March 1982

Volume 6, Number 1

EDITORIAL PREVIEW	ii
-------------------------	----

APPLICATION

"Computer-Aided Analysis of Office Systems," Benn R. Konsynski and Lynne C. Bracker, University of Arizona	1
---	---

Computer-aided support in the analysis and design of office information systems is discussed

"SMIS Members: A Membership Analysis," Leslie Ball, Babson College, and Richard Harris, Colonial Gas Company	19
---	----

Discusses the results of a survey of SMIS members regarding demographics, SMIS services, and the importance of eighteen management issues which MIS management might address.

"A Selection Model for Systems Development Tools," Justus D. Naumann, University of Minnesota, and Shailendra Palvia, Federal Reserve Bank	39
---	----

A quantitative approach to the selection of currently available systems development methodologies and development techniques is presented.

THEORY AND RESEARCH

"The Manager-Analyst Interface in Systems Development," Kate M. Kaiser, University of Wisconsin at Milwaukee, and William R. King, University of Pittsburgh	49
---	----

Reports the results of a study of the user-analyst liaison function in system development in thirty-eight large firms.

"A Multiple Criteria Approach for Evaluating Information Systems," John S. Chandler, University of Illinois at Urbana	61
--	----

Provides the analyst with a framework for gaining insight into information system performance from both user and system viewpoints by establishing a causal relationship between user goal attainment and system activity.
